# ALLEVIATE PAIN RESTORE HEALTH EXTEND LIFE

## Living Our Mission With You

Our Mission guides our day-to-day work and reminds us that our efforts, large and small, transform the lives of millions of people each year.

We have been working with you to deliver trusted and innovative cannula options for more than 35 years for standard, pediatric and MICS procedures — while offering your favorite cardiac suction, surgical support items and cardio-kits.

Together, we can deliver the cardiac cannula solutions that matter most to you — and your patients.

# FIND YOUR IDEAL **ARTERIAL CANNULAE**

Arterial cannulae are intended to deliver oxygenated blood to the heart. Medtronic understands the importance of gentle flow in the often fragile aorta, and we offer a number of different product variations to facilitate a variety of surgical techniques and patient anatomies. Our adult and pediatric arterial cannulae are available in sizes from 6 Fr to 24 Fr in a variety of tip configurations, lengths, and connector sizes to meet your specific needs.

## Important Safety Information

Care and caution should be taken to avoid damage to vessels and cardiac tissue during cannulation or other cardiac surgery procedures. For a listing of indications, contraindications, precautions, warnings, and potential adverse events, please refer to the Instructions for Use. Caution: Federal law (USA) restricts this device to sale by or on the order of a physician.

## Soft-Flow®\* Extended Arterial Cannulae

These arterial models were the first available diffusion tip cannulae on the market. This design features a closed-tip with an inner cone that directs flow through side vents. This results in a diffuse, lower velocity flow. The extended length, kink-resistant wirewound body allows for use across various patient anatomies. An orientation line, depth markings and a suture ring assist with positioning of the cannulae.

## Soft-Flow®\* Straight Tip Arterial Cannulae

These arterial models were the first available diffusion tip cannulae on the market. A smooth, tapered, reverse-angle tip is designed to facilitate insertion and placement. An orientation line, depth markings — and a suture bulb assist with positioning the cannulae. All cannulae feature kink-resistant wirewound bodies and a 3/8" vented or non-vented connector.

## Soft-Flow® Angled Tip Arterial Cannulae

These arterial models were the first available diffusion tip cannulae on the market. A smooth, tapered, reverse-angle tip is designed to facilitate insertion and placement. An orientation line, depth markings — and a suture bulb or flange, assist with positioning the cannulae. All cannulae feature kink resistant wirewound bodies and a  $\frac{3}{8}$ " vented or non-vented connector.

## Important Safety Information

EOPA 3D models: Cannula tip must be inserted beyond side ports to minimum depth marks to avoid possibility of tissue dissection of the aorta. Care and caution should be taken to avoid damage to vessels and cardiac tissue during cannulation or other cardiac surgery procedures. For a listing of indications, contraindications, precautions, warnings, and potential adverse events, please refer to the Instructions for Use. Caution: Federal law (USA) restricts this device to sale by or on the order of a physician.

# Select 3D™ II Arterial Cannulae

# FIND YOUR IDEAL **FEMORAL CANNULAE**

Femoral cannulae provide greater versatility of cannulation techniques to meet the needs of the changing patient population and the desire for smaller thoracic incisions. Designed to be placed in the femoral vein and/or artery, Medtronic femoral cannulae are ideally suited for both percutaneous and direct insertion. The unique flat wirewound, thin-wall construction of the Bio-Medicus Cannulae maximizes flow rates and cannula flexibility. Our various sizes in this product ensure the availability of a cannula to meet your specific needs.

For a listing of indications, contraindications, precautions, warnings, and potential adverse events, please refer to the Instructions for Use. Caution: Federal law (USA) restricts this device to sale by or on the order of a physician.

# Bio-Medicus™ NextGen Pediatric Arterial and Venous Cannulae

These upgraded pediatric cannulae offer a flexible kink-resistant thin-wall design that promotes maximum flow rates. A re-engineered tip design eases insertion and provides a reinforced non-step transition zone along with smoother side ports. Both venous and arterial models are packaged with a tapered solid core and a percutaneous-style (0.025 mm dia) non-phthalate PVC introducer — allowing for either a traditional or percutaneous insertion. Each cannula includes a repositionable radiopaque suture ring, an improved friction-fit cap and a retention clip that aids in tubing management. These products are manufactured without DEHP.

# Bio-Medicus™ NextGen Femoral Arterial or Jugular Venous Cannulae

These enhanced adult cannulae offer a flexible kink-resistant thin-wall design that promotes maximum flow rates. A re-engineered tip design eases insertion and features a one-piece non-phthalate PVC introducer, a reinforced non-step transition zone and smoother side ports. A silicone friction-fit cap and introducer provide improved function as well. The percutaneous-style introducer is now standard on all sizes — along with a repositionable radiopaque suture ring. A shortened clamp site eases tubing management and is equipped with a 3/8 inch standard connection site.

# Bio-Medicus™ NextGen Femoral Venous Cannulae

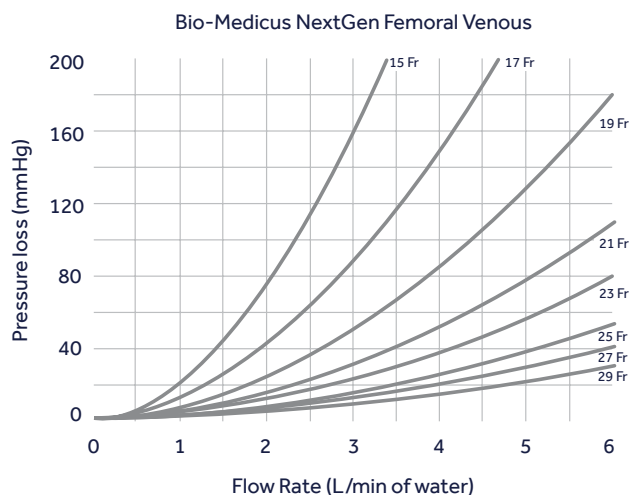

These enhanced adult cannulae feature a flexible kink-resistant thin-wall design that promotes maximum flow rates. An updated tip design offers an elongated taper, a one-piece non-phthalate PVC introducer, a reinforced non-step transition zone and smoother side ports. All of these enhancements add up to an easier insertion. Additional side ports accommodate positioning across the right atrium to allow bi-caval drainage at the SVC and hepatic veins. A silicone friction fit cap and introducer provide improved function as well. Each model is standard with a percutaneous-style introducer, a repositionable radiopaque suture ring and a 3/8 inch connection site. Larger French sizes are packaged with a 3/8 to 1/2 inch tubing adapter.

## Bio-Medicus™ NextGen Insertion Kits

These adult and pediatric insertion kits provide components for peripheral cannulation via seldinger technique. Designed for percutaneous or direct visualization insertion, these kits provide the following insertion components as listed below.

### Venous

96551

- 0.038 in (0.965 mm) diameter; 180 cm (70.87 in) guidewire
- #11 scalpel blade
- 10 cc syringe
- Stepped vessel dilator, 8 Fr/10 Fr, 12 Fr/14 Fr and 16 Fr/18 Fr
- Seldinger needle, 18 ga (1.02 mm)

*5 kits per carton*

### Arterial/Jugular

96552

- 0.038 in (0.965 mm) diameter; 100 cm (39.37 in) guidewire
- #11 scalpel blade
- 10 cc syringe
- Stepped vessel dilator, 8 Fr/10 Fr, 12 Fr/14 Fr and 16 Fr/18 Fr
- Seldinger needle, 18 ga (1.02 mm)

*5 kits per carton*

### Pediatric Arterial/Venous

96553

- 0.025 in (0.535 mm) diameter; 60 cm (23.62 in) guidewire
- #11 scalpel blade
- 10 cc syringe
- Stepped vessel dilator, 8 Fr/10 Fr, 12 Fr/ 14 Fr
- Seldinger needle, 18 ga (1.02 mm)

# FIND YOUR IDEAL **VENOUS CANNULAE**

Venous cannulae are designed to provide optimal venous drainage while providing flexibility and ease of use. We offer a variety of single stage venous cannulae with kink-resistant wirewound bodies in sizes from 12 Fr to 40 Fr. These cannulae are offered in both straight and right angle with multi-port tips and the option for a thin wall metal tip design. Our product breadth ensures the availability of a cannula to meet your specific needs.

# DLP™ Malleable Single Stage Venous Cannulae

These pediatric and adult cannulae feature multi-port tips and malleable, one-piece, kink-resistant wirewound bodies with depth markings. This construction allows the surgeon to shape the cannulae. An integrated malleable wire outside the wirewinding optimizes the inner diameter (I.D.) for maximum flow performance.

### Important Safety Information

The introduction of air into the right heart may result in the immediate total loss of venous drainage to the extracorporeal circulation. Care and caution should be taken to avoid damage to vessels and cardiac tissue during cannulation or other cardiac surgery procedures. For a listing of indications, contraindications, precautions, warnings, and potential adverse events, please refer to the Instructions for Use. Caution: Federal law (USA) restricts this device to sale by or on the order of a physician.

# FIND YOUR IDEAL **ANTEGRADE CANNULAE**

Antegrade cannulae are designed to deliver cardioplegia solution to the heart via the coronary ostia in the normal direction of blood flow (antegrade perfusion). Aortic root cannulae are intended to either aspirate air from the aorta or infuse cardioplegia solution directly into the aortic root near the aortic valve. We offer adult and pediatric aortic root cannulae in varying lengths to accommodate various techniques and patient anatomies. Our product breadth ensures the availability of a cannula to meet your specific needs.

## MiAR™ Cannulae

These Minimally Invasive Aortic Root (MiAR) models feature a 12.25 in (31 cm) cannula body to allow access into the chest for small incision techniques. This length also allows positioning of the luer connection to the cardioplegia line out of the surgeon's way, outside the chest incision. Additionally, these MiAR models include the Flow-Guard™ feature to maintain hemostasis during removal of the needle from the cannula.

# FIND YOUR IDEAL **RETROGRADE CANNULAE**

Retrograde cannulae are designed to deliver cardioplegia solutions to the heart via the coronary sinus in the reverse direction of normal blood flow (retrograde perfusion). We offer the retrograde cannulae in pediatric and adult sizes. The pediatric cannulae are offered with silicone bodies, with or without a guidewire stylet, and a manual-inflate cuff. Adult models are offered with a silicone or PVC body, a solid or guidewire stylet with a variety of handle options, and an auto- or manual-inflate cuff. The purpose of the cuff is to occlude the opening of the coronary sinus, forcing cardioplegia flow to the coronary vessel bed of the heart. Manual-inflate models require the clinician to inflate the cuff prior to delivering cardioplegia. Our product breadth ensures the availability of a cannula to meet your specific needs.

# MiRCSP™ Cannulae

The MiRCSP cannula is a retrograde cardioplegia cannula for cardiac surgeons who seek to differentiate themselves through the use of less invasive valve procedures performed through small thoracic incisions. Unlike traditional retrograde coronary sinus perfusion cannulae, the MiRCSP cannula includes the unique features of tip deflection and sweep that allow the surgeon to place it trans-atrial into the coronary sinus through small thoracic incisions (mini-sternotomy or right thoracotomy). Additional features enhance visibility on echocardiography or fluoroscopy to further facilitate cannula placement.

Silicone auto-inflating cuffs offer the convenience of cuff inflation without the need for a syringe. Their unique flow-through design allows cardioplegia to circulate through the cuff before exiting the cannula tip. These cuffs also feature a dual pressure monitoring system: which normally provides intra-sinus pressure monitoring through the port in the tip. However, should the tip inadvertently become occluded, the second port will monitor intra-cuff pressure. This feature greatly reduces the potential for coronary sinus damage due to over inflation.

# FIND YOUR IDEAL **CARDIOPLEGIA ADAPTERS**

Cardioplegia adapters are designed to permit customization of the cardioplegia circuit. Medtronic adapters can be used to connect multiple cardioplegia cannulae and/or vein graft cannulae to a single inlet source, switch between antegrade and retrograde delivery of cardioplegia and provide the option for attaching a vent line to cardioplegia cannulae. Additional adapters are available to extend the length of the cardioplegia circuit, recirculate the cardioplegia solution, or provide an extension to the pressure monitoring line.

# FIND YOUR IDEAL SUCTION CIRCUIT

We offer suction products that are designed to provide either fine or gross suction to ensure a clear and dry surgical field. The Medtronic hand-held cardiac suction tubes are designed for fine suction, while our intracardiac suction tubes and sumps are intended to provide suction within and around the heart. The Medtronic left heart vent catheters are designed for indirect and direct venting of the left ventricle and feature perforated tips. These vents are offered in different lengths, introducer styles, and in both silicone and PVC body construction. Our product breadth ensures the availability of a cannula to meet your specific needs.

### Important Safety Information

With DLP pulmonary artery vent cannulae, the degree of suction should be monitored to reduce the possibility of air embolism. Care and caution should be taken to avoid damage to vessels and cardiac tissue during cannulation or other cardiac surgery procedures.

## DLP™ Left Heart Vent Catheters

These vent catheters are for direct and indirect venting of the left ventricle and feature perforated tips. A choice of either PVC or silicone is available, along with straight, preformed, or malleable bodies with depth markings. These vents are available in pediatric and adult sizes. Straight body models come with a malleable or stiff guidewire style introducer for easy insertion and placement. All vent catheters terminate with a vented or non-vented ¼ in (0.64 cm) connector.

## DLP™ I.M.A. Cannula

This cannula features a stainless steel shaft with a bulb-shaped tip terminating with a female luer.

### 1.8 in (4.6 cm) overall length

31001	1 mm tip
-------	----------

20 per carton

### Important Safety Information

Care and caution should be taken to avoid damage to vessels and cardiac tissue during cannulation or other cardiac surgery procedures.

## DLP™ Arteriotomy Cannulae

These cannulae feature a polyurethane tube with a bulb-shaped radiopaque tip connected to a winged female luer.

### 1.3 in (3.3 cm) overall length

31002	2 mm tip
31003	3 mm tip
<i>20 per carton</i>	

### 2.3 in (5.8 cm) overall length

31102	2 mm tip
31103	3 mm tip
31104	4 mm tip
31105	5 mm tip

31202	2 mm tip
31203	3 mm tip
31204	4 mm tip
<i>20 per carton</i>	

## DLP™ Pressure Sensing Syringes

These syringes have a predetermined pressure setting and a 30 cc volume. The plungers give tactile feedback upon reaching the predetermined pressure. All syringes have a male luer at the tip.

### Pre-set pressure point

65000	240 mmHg
65125	125 mmHg
<i>10 per carton</i>	

### Important Safety Information

For a listing of indications, contraindications, precautions, warnings, and potential adverse events, please refer to the Instructions for Use. Caution: Federal law (USA) restricts this device to sale by or on the order of a physician.

## DLP™ Phrenic Nerve Pads

These pads are designed to help protect the phrenic nerve from the extreme cold during surgery. They are made of a closed-cell foam and contain slots. These slots can hold a pericardial sump in place. A radiopaque marker is tied to the pad.

38002	Medium
38003	Large
<i>10 per carton</i>	

## DLP™ Cardiac Insulator

This insulator is designed to protect the heart against heat transfer. This product features a malleable closed-cell foam that conforms to the desired shape.

38202	Medium
<i>10 per carton</i>	

### Important Safety Information

Care and caution should be taken to avoid damage to vessels and cardiac tissue during cannulation or other cardiac surgery procedures.

## DLP™ Cardiac Sling

This sling is designed to support the heart and improve exposure. It reduces the need for additional assistants during the anastomosis of the circumflex vessels.

39000	Cardiac Sling
<i>10 per carton</i>	

## DLP™ Coronary Artery Retraction Clips

These clips are designed to help improve exposure to a coronary anastomosis site. Small prongs grab and gently hold tissue away from the vessel to improve vision.

16130	3.0 mm prong length
16150	5.0 mm prong length
<i>10 per carton</i>	

### Important Safety Information

For a listing of indications, contraindications, precautions, warnings, and potential adverse events, please refer to the Instructions for Use. Caution: Federal law (USA) restricts this device to sale by or on the order of a physician.

## DLP™ Left Atrial Pressure Monitoring Catheter Placement Sets

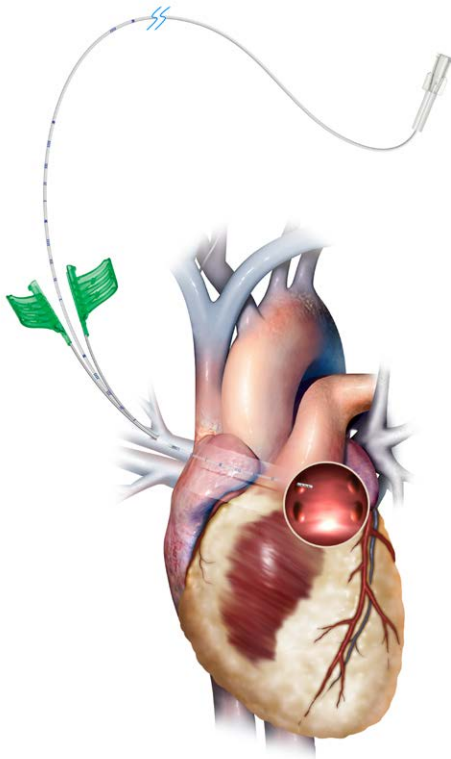

These sets are an ideal option for measuring cardiac performance postoperatively. The catheters measure left atrial pressure in real time to accurately display critical pre-load pressures of the left heart. The catheter tubing has depth markings and is attached to a female luer. There is a self adhesive anchoring collar for securing the catheter at the desired location.

### 24 in (61.0 cm) overall length

50010	3 Fr (1.0 mm) catheter with 2 - 17 ga peel away needles
50011	5 Fr (1.7 mm) catheter with 2 - 14 ga peel away needles

10 per carton

Catheter models 50010 and 50011 are inserted through the chest wall and into the right superior pulmonary vein using two peel away needles. The peel away needles permit catheter insertion through the chest wall and pulmonary vein without utilizing an integral introducer.

### Important Safety Information

Care and caution should be taken to avoid damage to vessels and cardiac tissue during cannulation or other cardiac surgery procedures.

## DLP™ IV-Decanters

These decanters include several features to facilitate aseptic decanting of fluids from intravenous containers. They include large bore spikes attached to rigid or flexible tubing. Some decanters have clamps, thereby eliminating spillage and reducing contamination.

### 8.5 in (21.6 cm) overall length

40040	Flexible tubing and clamp
40045	Rigid tubing

20 per carton

## DLP™ Rapid Prime Sets

These sets facilitate the transfer of fluids during the priming of the circuit. They feature large bore spikes attached to flexible tubing with a clamp, and terminate with either an open end tube or a male luer.

### 14 in (35.6 cm) overall length

With male luer

10021

10 per carton

### 16 in (40.6 cm) overall length

With open end tube

10023

10 per carton

### Important Safety Information

For a listing of indications, contraindications, precautions, warnings, and potential adverse events, please refer to the Instructions for Use. Caution: Federal law (USA) restricts this device to sale by or on the order of a physician.

## Pressure Display Box

The Pressure Display Box is ideal for monitoring line pressures in the extracorporeal and cardioplegia delivery circuits along with a variety of other sites where real time pressure readouts are critical.

Features include:

- Large easy-to-read display
- Variable alarm settings (high or low)
- Protective guards on switches
- Readouts in systolic, diastolic, or mean pressures
- Zero functions
- Compact size
- Pole mount clamp
- Battery operated
- Integral alarm with warning light and mute switch
- Uses disposable Pressure Display Sets

66000

1 per carton

## DLP™ Disposable Pressure Display Sets

These display sets are for use with the Pressure Display Boxes. They feature a silicone diaphragm inside a plastic dome with a stopcock that attaches to the transducer fitting on the Pressure Display Box. This dome is attached to a coil of tubing that terminates with either a male luer or a stopcock for convenient handling.

### 45 in (1.14 m) overall length

# FIND YOUR IDEAL **CARDIO-KITS AND PACKS**

The Medtronic Cardio-Kit is designed for you. Medtronic understands that each surgeon and cardiopulmonary circuit are unique, and we offer you the ability to customize a Cardio-Kit of Medtronic Cannulae to your specifications. The Cardio-Kit provides simplified packaging, procedure efficiency, and a streamlined ordering process designed to meet your specific needs.

## DLP™ Cardio-Kits

Instead of ordering all your products separately, have a custom kit made specifically for you. Medtronic Cardio-Kits contain invaluable tools for surgeons, nurses, and purchasing teams.

### Built to Your Specification

This enables the surgical team to choose the Medtronic DLP Cannulae they prefer.

### Simplified Packaging

Keeps products neatly organized and reduces unnecessary waste of multiple product pouches.

### Easy to Order

Instead of ordering multiple product codes separately, only one code is ordered and stocked.

### Easy to Use

All Medtronic DLP products are placed on the surgical field at one time and ready to use.

### Personalized Tray and Label

The products you need are in one package with a label that we'll personalize with the surgeon's name, procedure being performed, or other title of your choice.
